

**NAME**

libmovim – MovIm library

**SYNOPSIS**

**libmovim** -t | -h | -v

**DESCRIPTION**

**MovIm** is a video codec specifically designed for both conservation and restoration of moving images.

**libmovim** is a C library implementing **MovIm**.

The **openMovIm** package includes the **libmovim** library and its associated **movimenc**, **movimdec** and **movimplay** utilities, as well as the **openmovim** Bash command-line interface.

**OPTIONS**

**-t, --test**

test that the **libmovim** library is correctly installed and properly working

**-h, --help**

display a help message

**-v, --version**

display the installed version of **libmovim** in the date-based *YYYY-MM-DD* format and the implemented version of **MovIm** in the semantic *major.minor[.patch]* format

**SEE ALSO**

**movim(1)**; **movimdec(1)**, **movimenc(1)** and **movimplay(1)**; **openmovim(1)**.
